

Volume III – BMPs Technical Design Manual

Table of Contents

<u>Chapter</u>		<u>Page</u>
Chapter 1	Introduction	
Chapter 2	Stormwater Hydrology	
	2.1 Controlling Peak Discharges and Runoff Volumes	2-2
	2.2 Factors Affecting Runoff	2-3
	2.3 Runoff Estimating/Hydrologic Modeling	2-11
	2.3.1 Water Quality Volume	2-12
	2.3.2 Runoff Volume and Peak Rate (Single Event)	2-12
	2.3.3 Frequency vs. Discharge Analysis	2-15
	2.3.4 Flood Routing/Storage Estimating	2-15
	2.4 Hydrologic Data for Maine	2-15
	References.....	2-16
Chapter 3	Peak Control/Detention Structures	
	3.1 General Description	3-1
	3.2 Site Suitability Criteria	3-2
	3.3 General Design and Construction Criteria.....	3-2
	3.4 Surface Detention Basin Design Criteria.....	3-4
	3.5 Subsurface Detention Basin Design Criteria	3-7
	3.6 Maintenance Criteria.....	3-8
	References.....	3-8
Chapter 4	Wet Ponds	
	4.1 General Description	4-1
	4.2 Site Suitability Criteria	4-2
	4.3 Design and Construction Criteria.....	4-2
	4.3.1 General Criteria.....	4-2
	4.3.2 Criteria to Meet the BMP Standards	4-7
	4.3.3 Criteria for Standard Outlets and Peak Control	4-9
	4.3.4 Maintenance Criteria.....	4-10
	References.....	4-11
Chapter 5	Buffers	
	5.1 General Criteria.....	5-1
	5.1.1 General Description	5-1
	5.1.2 General Size Suitability Criteria	5-2
	5.1.3 General Design and Construction Criteria.....	5-2
	5.1.4 General Maintenance Criteria	5-4

<u>Chapter</u>	<u>Page</u>
5.2 Types of Buffers	5-5
5.2.1 Buffer Adjacent to Residential, Largely Pervious or Small Impervious Areas.....	5-5
5.2.2 Buffer with Stone Bermed Level Lip Spreader	5-7
5.2.3 Buffer Adjacent to the Down Hill Side of a Road....	5-11
5.2.4 Ditch Turn Out Buffer	5-12
References.....	5-14
Chapter 6 Infiltration BMPs	
6.1 General Criteria.....	6-1
6.1.1 General Description	6-1
6.1.2 General Site Suitability Criteria.....	6-2
6.1.3 General Design and Construction Criteria.....	6-3
6.1.4 General Maintenance Criteria	6-6
6.2 Types of Infiltration BMPs	6-8
6.2.1 Dry Wells	6-8
Design and Construction Criteria.....	6-8
Maintenance.....	6-8
6.2.2 Infiltration Trench.....	6-10
Design and Construction Criteria.....	6-10
Maintenance.....	6-11
6.2.3 Infiltration Basin	6-12
Design and Construction Criteria.....	6-12
Maintenance	6-13
References.....	6-14
Chapter 7 Filtration BMPs	
7.1 Underdrained Soil Filters and Bioretention Cells.....	7-1
7.1.1 Description.....	7-1
7.1.2 Site Suitability Criteria	7-2
7.1.3 General Design and Construction Criteria.....	7-3
7.1.4 Grassed Underdrained Soil Filters Design Criteria ...	7-6
7.1.5 Bioretention Cells Design Criteria.....	7-7
7.1.6 Maintenance Criteria.....	7-7
7.2 Proprietary Systems	7-8
Chapter 8 Conveyance and Distribution Systems	
8.1 Vegetated Swales	8-1
8.1.1 Description.....	8-1
8.1.2 Site Suitability Criteria	8-2
8.1.3 Design and Construction Criteria.....	8-2
8.1.4 Maintenance.....	8-4

<u>Chapter</u>		<u>Page</u>
	References.....	8-4
8.2	Flow Splitter (Flow Bypass)	8-5
	8.2.1 Description.....	8-5
	8.2.2 Design Criteria	8-5
	8.2.3 Maintenance.....	8-6
	References.....	8-6
8.3	Level Spreader	8-7
	8.3.1 Description.....	8-7
	8.3.2 Site Suitability Criteria	8-7
	8.3.3 Design and Construction Criteria.....	8-7
	8.3.4 Maintenance.....	8-9
	References.....	8-9
Chapter 9	Separator BMPs	
9.1	Water Quality Inlet	9-1
	9.1.1 Description.....	9-1
	9.1.2 Design Criteria	9-2
	9.1.3 Maintenance.....	9-2
	References.....	9-2
9.2	Oil/Grit and Oil/Water Separators	9-3
	9.2.1 Description.....	9-3
	9.2.2 Design Criteria	9-3
	9.2.3 Maintenance.....	9-3
	References.....	9-4
9.3	Proprietary Systems	9-5
Chapter 10	LID Design Practices and Techniques	
	Description.....	10-1
	Site Suitability Criteria	10-2
10.1	Planning for LID	10-2
	10.1.1 Minimize Site Clearing	10-3
	10.1.2 Minimize Impervious Areas	10-3
	10.1.3 Minimize Connected Impervious Areas	10-4
	10.1.4 Maintain Time of Concentration.....	10-5
	10.1.5 Manage Stormwater at the Source	10-5
	References.....	10-5
10.2	LID Techniques	10-6
	10.2.1 Bioretention Areas and Raingardens	10-6
	10.2.2 Infiltration	10-6
	10.2.3 Filter Strips/Vegetated Buffers	10-6
	10.2.4 Vegetated Swales	10-6
	10.2.5 Level Spreader	10-6

<u>Chapter</u>		<u>Page</u>
	10.2.6 Porous Pavement.....	10-7
	Types of Porous Pavement.....	10-7
	General Site Suitability Criteria.....	10-9
	General Maintenance Criteria.....	10-10
	References.....	10-10
	10.2.7 Rain Barrels and Cisterns.....	10-11
	Design Criteria.....	10-11
	Maintenance Criteria.....	10-12
	References.....	10-12
	10.2.8 Rooftop Greening.....	10-12
	Maintenance Criteria.....	10-16
	References.....	10-17
	10.2.9 Other Techniques.....	10-17
Chapter 11	Designing for Operation and Maintenance	
	11.1 Description 11-1	
	11.2 Design and Construction Criteria.....	11-2
	References 11-3	
Appendix A	Hydrologic Data for Maine	
Appendix B	Runoff Estimation & Hydrologic Models	
Appendix C	Proprietary Hydrology and Hydraulics Computer Programs	
Appendix D	Templates for Deed Restrictions & Conservation Easements	
Appendix E	Example LID Measures	
List of Tables		
Table 1-1	Best Management Practice Type Selection Matrix.....	1-3
Table 2-1	24 Hour Duration Rainfalls for Various Return Periods	2-5
Table 2-2	Rainfall Distribution Comparisons for Maine	2-6
Table 2-3	Total Five Day Antecedent Rainfall	2-9
Table 2-4	Selection Criteria for Runoff Calculations	2-13
Table 2-5	Maine Department of Transportation Application of Hydrologic Methods for Peak Flow.....	2-14

<u>Table</u>		<u>Page</u>
Table 5-1	Required Buffer Flow Path Length Per Soil & Vegetative Cover Types with 0-8% Buffer Slope	5-6
Table 5-2	Required Buffer Flow Path Length Per Soil & Vegetative Cover Types with 9-15% Buffer Slope	5-6
Table 5-3	Berm Stone Size.....	5-8
Table 5-4	Required Buffer Flow Path Length of a Buffer with 0-8% Slope & a Stone Bermed Level Lip Spreader	5-9
Table 5-5	Required Buffer Flow Path Length of a Buffer with 9-15% Slope & a Stone Bermed Level Lip Spreader	5-10
Table 5-6	Required Buffer Flow Path Length Adjacent to the Down Hill Side of a Road.....	5-11
Table 5-7	Required Buffer Flow Path Length Per Length of Road or Ditch with 0-8% Buffer Slope	5-13
Table 5-8	Required Buffer Flow Path Length Per Length of Road or Ditch with 9-15% Buffer Slope	5-14
Table 7-1	ME DOT Specifications for Underdrains (MEDOT #703.22)	7-4
Table 7-2	Soil Filter Media (Option 1)	7-5
Table 7-3	ME DOT Specifications for Underdrains (MEDOT #703.01)	7-5
Table 7-4	Coarse Loamy Sand Sieve Analysis Specification (Option 2)	7-5
Table 10-1	Comparison of Porous Pavement.....	10-8
Table 11-1	Long-Term Inspection & Maintenance Plan.....	11-4

List of Figures

Figure 2-1	Schematic of Multi-Stage Discharge Detention Structure.....	2-2
Figure 2-2	Frequency Discharge Curve.....	2-3
Figure 2-3	Type II and Type III Storm Distributions in Maine.....	2-7
Figure 3-1	Typical Detention Basin	3-9

Figure 3-2	Typical Subsurface Detention Basin.....	3-10
Figure 4-1	Typical Wet Pond with Underdrain Outlet	4-12
Figure 4-2	Typical Wet Pond with Underdrain Outlet	4-13
Figure 5-1	Buffer Adjacent to Residential Areas	5-15

<u>Figure</u>		<u>Page</u>
Figure 5-2	Buffer with Stone Bermed Level Lip Spreader	5-16
Figure 5-3	Buffer Adjacent to the Down Hill Side of a Road	5-17
Figure 5-4	Typical Ditch Turnout Buffer	5-18
Figure 6-1	Typical Dry Well	6-16
Figure 6-2	Typical Surface Infiltration Trench	6-17
Figure 6-3	Typical Subsurface Infiltration Trench.....	6-18
Figure 6-4	Typical Infiltration Basin.....	6-19
Figure 7-1	Vegetated Underdrain Soil Filter Field (Option 1).....	7-9
Figure 7-2	Vegetated Underdrain Soil Filter Filed (Option 2).....	7-10
Figure 7-3	Typical Bioretention Cell (Option 1).....	7-11
Figure 7-4	Typical Bioretention Cell (Option 2).....	7-12
Figure 7-5	Alternative Soil Filter Layouts.....	7-13
Figure 8-1	Typical Swale with Checkdams.....	8-10
Figure 8-2	Flow Splitter.....	8-11
Figure 8-3	Typical Surface Flow Splitter in Forebay	8-12
Figure 9-1	Water Quality Inlet	9-6
Figure 9-2	Typical Oil/Grit Separator	9-7
